STONE QS20 PEN

Product description

Introducing QS20 Stone Pens: a low-polluting writing system that is a versatile and impactful brand ambassador with a fusion of style, sustainability and functionality. Made from a unique material blend enriched with minerals, they boast a 60% reduction in plastic content while increasing weight by 50%, resulting in a substantial and noticeable difference in feel.

QS20 Stone Pens are designed for long-lasting use, minimising environmental impact at every stage, from materials to production to distribution. They offer high-quality personalisation options, including clips in various shapes, materials, and finishes with antimicrobial surface treatment.
